

## Agricultural Tourism

ecoPlan & Design has been extensively involved in a number of projects that provide a full range of services including permitting, site planning, design development, construction documentation and landscape architecture. We have created turn-key solutions from project conception to construction completion, managing architectural design; civil, structural, and geotechnical engineering; cultural resources; and construction elements with firms experienced in developing agri-tourism projects.

### Chelan, WA

#### Tsillan Cellars Vineyard & Winery

ecoPlan & Design provided site planning, permitting, and design services for this project from concept to completion. Key elements included pedestrian and vehicle circulation, parking, building sites, water features, landscaping, grading plans, and utility development as well as providing coordination for governing agencies.

### Manson, WA

#### Benson Vineyards and Estate Winery

The owners' exacting design criteria for this 28 acre estate vineyard overlooking Lake Chelan called for creating an environment that reflects the ambiance of the distinctive wines produced at the vineyard. ecoPlan & Design was responsible for assembling and managing a design team to meet their expectations, and for providing site planning, grading, landscape design, and permitting services.
