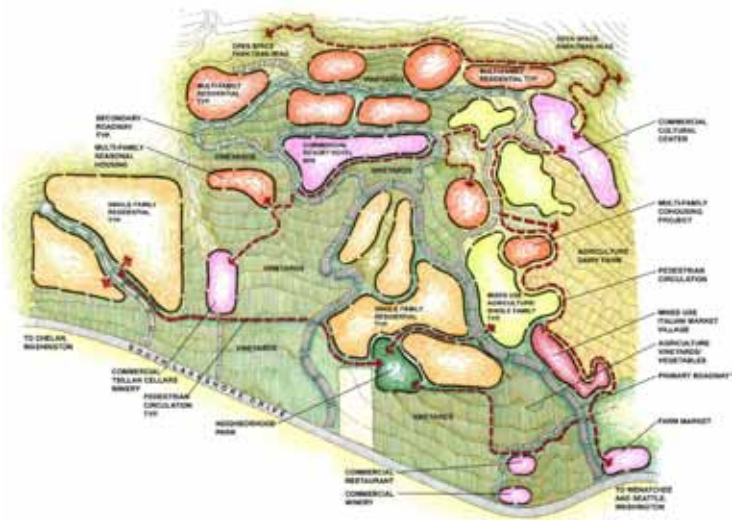
Large Scale Site Planning

ecoPlan & Design's expertise with large scale site planning is well respected in the industry. Our unique approach considers terrain, views, traffic flow, and green spaces, and always incorporates a sense of community. This emphasis results in "user friendly" environments for those who choose to work and live in the areas we have designed.



Chelan, WA
Tuscan Village

We provided early conceptualization of this Tuscan themed, multi-use, resort complex. The site will contain learning centers, single and multi-family residences, resort complex with a hotel, a restaurant, and other amenities.

Orondo, WA
Dessert Highlands at Dessert Canyon Golf Resort

This 88 acre project sits in the middle of the golf resort. The design emphasizes mountain, river and course views with park amenities. It is a 140 lot residential development.

Orondo, WA
Conceptual Residential Housing Development

This quick sketch was developed to show a perspective client one design philosophy verses "engineered" solutions previously provided to the client.
