

Sports Complexes:

ecoPlan and Design has been involved in the planning and design of several quad and tri-plexes, as well as single fields. These fields range from single use fields to multiple use fields including all forms of base ball-fields, soccer, football, and lacrosse.

We are able to provide the expertise and experience to plan and design fields on native soils to highly technical drainage systems associated with sand-based fields. We also have experience with various manufactures of synthetic turf.

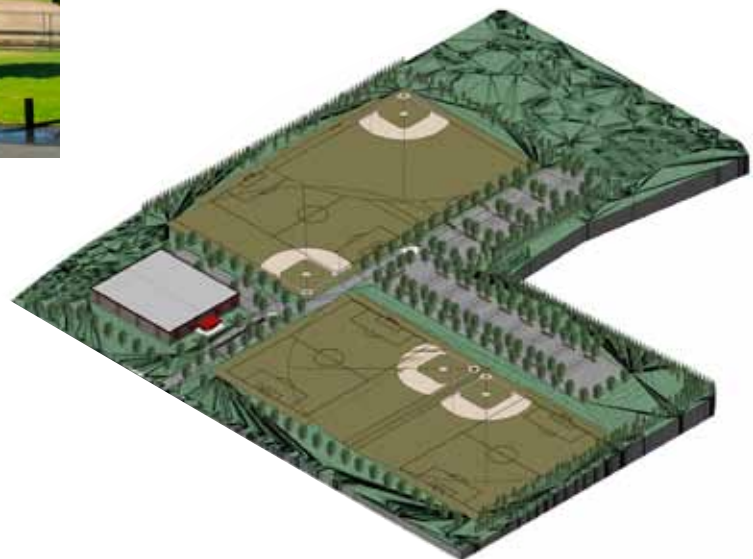

Walla Walla Point Quad-plex

This complex is used for baseball, soccer, and lacrosse. The season spans from early spring to late fall. Included within the complex are restrooms, scorer/announcer's facility and concessions.

Rock Island Hydro Tri-plex

This complex is used for baseball, soccer, and lacrosse. The season spans from early spring to late fall. Included within the complex are restrooms and concessions.

Wenatchee Sportsplex

ecoPlan and Design conducted siting studies over three properties to determine the suitability of site to contain at least two quad-plexes that would support a multiple sports as well as an indoor facility.
